A Hospitality AI Design Studio

AI Adoption for Hospitality Leaders

With the help of AI, hospitality companies can create extraordinary guest experiences at scale while lowering costs and focusing human potential where it matters most.

AI adoption can be challenging as it requires an understanding of the technology, its use cases, and a shift in thinking – an AI-first mindset.

Our training in AI adoption for the hospitality industry emphasizes practical use cases, enhancing learning among a cohort of hospitality leaders.

It includes AI fundamentals, prompt engineering, and industry best practices, all demonstrated through examples and exercises pertinent to a hospitality leader's responsibilities.

March 2024 Cohort
